## System Software Utilities - SW subject to License (App. A)

			Min. Amt.	Max. Amt.
TL-000	Sys Software Utilities	Software Utilities - Complexity 0.0 to 0.9 - SW subject to License (App. A)	\$37,190	\$90,150
TL-100	Sys Software Utilities	Software Utilities - Complexity 1.0 to 1.9 - SW subject to License (App. A)	\$90,690	\$143,650

### Establishing the Complexity Price

Each 1/10 increment equates to 1/9th of difference between minimum and maximum

For each P/N; maximum - minimum = difference/9 = 1 increment

**Complexity level .1:** minimum + 1 increment

**Complexity level .2:** minimum + 2 increments

### Establishing the Complexity Price

Each 1/10 increment equates to 1/9th of difference between minimum and maximum

**For each P/N;** maximum - minimum = difference/9 = 1 increment

**Complexity level .1:** minimum + 1 increment

**Complexity level .2:** minimum + 2 increments

### Establishing the Complexity Price

Each 1/10 increment equates to 1/9th of difference between minimum and maximum

**For each P/N;** maximum - minimum = difference/9 = 1 increment

**Complexity level .1:** minimum + 1 increment

**Complexity level .2:** minimum + 2 increments

## Establishing the Complexity Price

Each 1/10 increment equates to 1/9th of difference between minimum and maximum

**For each P/N;** maximum - minimum = difference/9 = 1 increment

**Complexity level .1:** minimum + 1 increment

**Complexity level .2:** minimum + 2 increments

## Establishing the Complexity Price

Each 1/10 increment equates to 1/9th of difference between minimum and maximum

**For each P/N;** maximum - minimum = difference/9 = 1 increment

**Complexity level .1:** minimum + 1 increment

**Complexity level .2:** minimum + 2 increments

### Establishing the Complexity Price

Each 1/10 increment equates to 1/9th of difference between minimum and maximum

For each P/N; maximum - minimum = difference/9 = 1 increment

Complexity level .1: minimum + 1 increment

Complexity level .2: minimum + 2 increments

### Establishing the Complexity Price

Each 1/10 increment equates to 1/9th of difference between minimum and maximum

**For each P/N;** maximum - minimum = difference/9 = 1 increment

**Complexity level .1:** minimum + 1 increment

**Complexity level .2:** minimum + 2 increments

### Establishing the Complexity Price

Each 1/10 increment equates to 1/9th of difference between minimum and maximum

For each P/N; maximum - minimum = difference/9 = 1 increment

Complexity level .1: minimum + 1 increment

Complexity level .2: minimum + 2 increments

### ATTI Software License Terms and Conditions

This Agreement defines the license terms and conditions under which Advanced Testing Technologies, Inc. ("ATTI") grants user rights in selected software to you, the end-user government customer (the "Licensee"). The term "Software" as used in this Agreement means (i) the software listed on ATTI's GSA schedule and delivered to the Licensee and (ii) the software delivered to the Licensee with a BRAT system listed on ATTI's GSA schedule, which software may include, for example, TCASE Run-time Software, TCASE Development Software or Self-test Software. The term "Software" includes both the object and source code versions of the Software, all executable files, drivers and utilities of the Software, and all updates, modifications or adaptations made to the Software by any person or party. The term "Software" does not include Test Program Sets or software typically provided with a general purpose computer (e.g., the operating system and general purpose utilities and drivers).

As of the date of delivery of Software to Licensee (the "Effective Date") and by its acceptance of delivery and use thereof, Licensee agrees as follows:

#### 1. GRANT OF LICENSE.

1.1. ATTI hereby grants to the Licensee a fully-paid, perpetual single-user license permitting the Licensee to use the Software on one computer at one time (the "License"). The Software must be used with a key provided by ATTI (the "Dongle") installed in the computer and may only be used at a Licensee facility. The Software must be used in accordance with the user manuals and other materials provided by ATTI or its licensors that describe one or more aspects of the Software (the "Documentation"). Licensee shall not make any Software available on any timesharing, service bureau, rental, cloud computing or similar basis. Licensee shall not disassemble, decompile, decrypt, extract or reverse engineer any Software, nor cause or permit anyone else to do so.

1.2. This License does not include the right to grant sublicenses or any right to the source code version of the Software. Licensee shall not modify or copy the Software, except that Licensee may make one copy for back-up purposes. The Software and Documentation are licensed with the express understanding of the Licensee that they are "commercial computer software" and "commercial computer software documentation" as such terms are defined in FAR §12.212 and DFARS 227.7202. Pursuant to such provisions, the use, duplication or disclosure by the United States Government of the Software and Documentation are subject to the terms and conditions of this Agreement. Licensee shall reproduce the following legend on all back-up copies:

#### © Advanced Testing Technologies, Inc. All Rights Reserved.

Use, duplication or disclosure by the U.S. Government of this Commercial Software is subject to restrictions as set forth in a License Agreement, in accordance with in FAR §12.212 and DFARS 227.7202. The licensor of this Commercial Software is Advanced Testing Technologies, Inc., P.O. Box 12391, Hauppauge, New York 11788.

1.3. All Software and Documentation are and shall remain the exclusive property of ATTI or its licensors, and are restricted by U.S. copyright laws and international treaty provisions. Licensee shall have no rights in the Software or Documentation, other than the license granted hereunder. ATTI reserves all rights with respect to the Software and Documentation under all applicable laws for the protection of proprietary information, including, but not limited to, trade secrets, copyrights, trademarks and patents.

1.4. Except as otherwise provided in this Agreement, Licensee shall not cause or permit copying, reproduction or disclosure of any portion of the Software or any Documentation, or the delivery or distribution of any part thereof to any third person or entity, for any purpose whatsoever, without the prior written permission of ATTI; *provided however*, that Licensee may disclose Software and the Documentation to a contractor to Licensee for use at a Designated Facility in order to perform work for Licensee, provided such contractor agrees in writing to the terms and conditions of this Agreement and such written agreement is delivered to ATTI. Licensee may transfer its rights under this License on a permanent basis provided (a) Licensee transfers this License, the software and documentation and retains no copies, (b) the recipient agrees to the terms of this License Agreement, and (c) Licensee notifies ATTI in writing of the name, address and business activity of the transferee at least 30 days before the proposed transfer. ATTI shall have the right to prohibit a proposed transfer to a competitor of ATTI or on other reasonable grounds.

#### 2. LIMITED WARRANTY, REMEDY AND LIABILITY/INDEMNIFICATION.

2.1. ATTI warrants that for a period of six (6) months after the Effective Date of this Agreement ("Warranty Period"), the Software will conform, in all material respects, to the Documentation. Any material deviation between the Software and the Documentation is referred to herein as an "Error." ATTI shall use commercially reasonable efforts to correct Errors at no charge to Licensee, provided that the Error is brought to ATTI's attention, in writing, during the Warranty Period. Errors may be corrected by ATTI by providing to Licensee appropriate media containing corrected versions of the affected ATTI Software. ATTI does not warrant that the Software will operate uninterrupted or be error-free.

## Appendix A

### ATTI Software License Terms and Conditions

2.2. The warranty set forth in section 2.1 is the sole and exclusive warranty made by ATTI with respect to the software and the sole and exclusive remedy of licensee in the event the software fails to conform, in all material respects, to its documentation, and all other warranties, express or implied, including, without limitation, warranties of merchantability or fitness for a particular purpose, are hereby expressly disclaimed. In no event shall ATTI be liable for any incidental, special, consequential or exemplary damages, irrespective of whether ATTI has been informed of, knew of, or should have known of the likelihood of such damages. ATTI's liability for any loss whatsoever, regardless of the cause, shall not exceed the license fees paid to ATTI for the use of the software.

2.3. ATTI will indemnify and hold Licensee harmless against any damages finally awarded against Licensee to the extent such damages are based on any claim that the Software, or any portion thereof, infringes a patent, trademark, copyright, trade secret or other proprietary right of a third party, provided that Licensee provides ATTI with timely written notice of the claim. In the event any Software is held to infringe, ATTI shall, at its option and sole expense, (a) obtain for Licensee a license to continue using the Software, (b) modify or replace the Software so that it is non-infringing, or (c) refund the license fees paid to ATTI for the Software, based on five (5) year straight line depreciation from the date of installation. ATTI shall have no obligation for any claim of infringement based, in whole or in part on Licensee's combination or use of the Software with software or equipment not furnished by ATTI or a modification to the Software made by Licensee. This Section states ATTI's exclusive responsibility and liability with respect to infringement claims arising out of Licensee's use of the Software. Licensee shall defend, indemnify and hold ATTI and its subcontractors and affiliates any third party vendors harmless from all losses, damages, costs, and expenses, including, without limitation, attorneys' fees and court costs, arising from or in connection with (a) the use of the Software in a manner not intended or prescribed in the Documentation or the misuse of the Software by Licensee, or (b) any breach of any representation or covenant of Licensee under this Agreement. Licensee shall conduct such defense with attorneys selected by it at its expense, and shall control the conduct of such defense, provided that ATTI may participate in such defense with ATTI's own attorneys, at ATTI's expense. ATTI shall notify Licensee of any asserted or threatened claim that may be subject to this indemnity, and shall cooperate with Licensee in conducting the defense.

### 3. GENERAL PROVISIONS.

3.1. This Agreement shall become effective on the Effective Date and shall continue in full force and effect until terminated upon thirty (30) days written notice pursuant to Article 3.2. Article 2 shall survive termination and will remain binding after the termination of this Agreement.

3.2. Licensee may terminate this Agreement at any time with or without cause. ATTI may terminate this Agreement upon any breach of Article 1. Upon termination of this Agreement, Licensee shall promptly purge all copies of the Software from any computers and storage device and return to ATTI or destroy all originals and copies of the Documentation and back-up copies of the Software. At ATTI's request, Licensee shall certify that it has complied fully with its obligation under this Section.

3.3. This Agreement represents, constitutes and expresses the entire agreement between the parties with respect to the subject matter contained herein and supersedes any previous oral or written communications, representations, understandings or agreements with respect thereto. If any provision of the Agreement is declared to be invalid, the parties agree that such invalidity shall not affect the validity of the remaining provisions of this Agreement, and further agree to substitute for the invalid provision a valid provision which approximates the intent and economic effect of the invalid provisions as closely as possible. This Agreement: (a) is subject to the Contract Disputes Act of 1978 and the Disputes clause of the Contract, if any; and (b) shall be governed by and construed in accordance with the laws and regulations governing contracts by the United States Government. To the extent that a court seeks to apply State law, this Agreement shall be governed by and construed in accordance with the laws of the State of New York, USA without giving effect to principles of conflict of laws. Licensee shall abide by all laws, rules and regulations applicable to the Software and Licensee's obligations under this Agreement, including all export regulations. Licensee agrees that any breach of Article 1 by Licensee would irreparably harm ATTI and monetary damages would be inadequate compensation; therefore, Licensee agrees that ATTI shall be entitled to preliminary and permanent injunctive relief to enforce those provisions of this Agreement and that no bond shall be sought or required.

#### Complex Rollup ITAs

- 1) Digital Complex Rollup
- 2) Electro Optic Complex Rollup
- 3) Analog/Digital Hybrid Complex Rollup
- 4) RF Complex Rollup

#### Variant TPS Development

This group consists of 11 levels of development ranging from Complexity 0 to Complexity 10, with level 10 the most complex. Within each complexity, nine additional subcomplexity levels exist.  
Example: Variant TPS Development - Complexity 1.0 to 1.9

#### Very Complex ITA Enhancements

The Very Complex ITA Enhancements consist of five levels ranging from Complexity 1 to Complexity 5, with level 5 the most complex. Within each complexity, nine additional subcomplexity levels exist.  
Example: Very Complex ITA Enhancement - Complexity 1.0 to 1.9

## Appendix B

### Test Program Sets (TPS) - Terms and Conditions

#### General

GSA price for TPS includes two (2) Program and Technical reviews and acceptance to be held at ATTI facility. GSA price includes TPS installation and checkout at one designated Buyer's facility. Conus only, non-conus travel and per diem extra.

TPS Complexity is based upon the UUT technical evaluation using furnished data. Estimates of TPS Complexity and completion do not include reverse engineering of TPS requirements. The Buyer must provide complete technical data (Technical Order, Schematics, Test Procedures, Wire Lists, Parts Lists, and Test Requirements Document).

#### Buyer Furnished Equipment and Data

The Buyer shall provide two (2) UUTs of each configuration 60 days ARO for the duration of the contract.

The Buyer is responsible for UUT Maintenance and Repair.

The Buyer is responsible to provide UUT data consisting of Schematics, Wire Lists, Test Specifications, and Specification Control Drawings.

The Buyer shall provide the ATE system (BRAT® or Non-BRAT®) for TPS integration 60 days ARO for the duration of the program. Buyer must provide ATE Users Guide, Programming Manual, Specifications sufficient for TPS development.

Late delivery of Buyer Furnished Equipment and Data will impact cost and delivery. Cost impact will be an additional 4% of the overall TPS cost per month. Schedule delivery will be a month-for-month delay until delivery of the requested Buyer Furnished Equipment and Data is provided.

#### TPS Acceptance Testing

TPS Acceptance Testing shall be performed at ATTI facilities using ATTI commercial ATP.

Acceptance Testing consists of fault insertion and end-to-end testing. The Buyer shall select five (5) faults per UUT for the fault insertion part of the Acceptance Test.

#### TPS Documentation

TPS includes ITA Drawings (sufficient for ITA repair), and TPS Test Strategy Report.

Additional Buyer requested data, such as Technical Manuals, Test Requirements Documents, Logistic Support Documentation is not included, and must be separately priced.

#### TPS Delivery

The following delivery schedule applies:

**Complexity 7 - on TPS:** up to 36 months

**Complexity 4 - 6 TPS:** up to 24 months

**Complexity 1 - 3 TPS:** up to 15 months

Contact ATTI for a description of Complexity Levels.

#### Travel

Additional charges for travel and per diem will be in accordance with the Joint Travel Regulations.

#### Payment Terms

Milestone Payment Schedule:

Equivalent to 90% of number of months which is calculated as follows:

Example: Period of performance is 24 months - payment schedule would be 1/24 per month of 90% of contract value.

Balance of 10%, which represents a holdback, would be payable upon sell-off.
